1. EXECUTIVE SUMMARY

Thank you for considering us for the launch of VerdeSip.

We see VerdeSip as more than a reusable water bottle. It is a simple, everyday product that brings together style, convenience, and a more conscious way of living. Our aim is to introduce the brand in a way that feels natural to today's audience—especially students, young professionals, gym-goers, and people who want practical products with a purpose.

For the launch, we have developed a creative direction that keeps the product at the centre while giving the brand a fresh and recognizable personality. The campaign combines lifestyle visuals, product features, promotional content, digital banners, video, and packaging artwork so that VerdeSip can communicate consistently across different platforms.

"Small Change, Big Impact."

Because choosing a reusable bottle may be a small change, but it can become a meaningful part of everyday life.
